

Update History ATLAS.ti 6

ATLAS.ti 6 (2009-2012)

ATLAS.ti 6.2.28

Release date: 2012-10-30

New, Fixed and Improved:

- Included one-time notification about ATLAS.ti 7
- Spurious survey import failure
- PDF floating point exception with certain documents

ATLAS.ti 6.2.27

Release date: 2011-09-01

New, Fixed and Improved:

- Save comments without confirmation when switching items in hierarchical managers (e.g., ObjectExplorer)
- Set focus to primary document pane when loading a PD via drop-down list. This removes the annoying switch to the next PD when pressing the cursor up/down keys. Press the shift-key simultaneously if you want to use the cursor keys for browsing through the PDs.
- New code-by-list button in code manager lets you code the current selection with the selected codes (as an alternative to drag & drop)
- New bullet icons for the HTML export
- Wordcruncher failed when one document was not available
- Autocoding: Fixed anomalies when filtering or deleting codes while autocoding was processed with confirm.
- Crashes with some multimedia documents
- Startup failure due to missing code page in rare circumstances
- Family assigner bug

ATLAS.ti 6.2.25-6.2.26

Release date: 2011-07-01

New, Fixed and Improved:

- Extreme Wordcruncher performance boost
- Streamlined workflow for creating Wordcruncher tables (default folder, automatic naming)
- Increased performance dramatically when opening family managers in large HUs (calculating the quotation count was the devil)

- Increased performance with super codes
- Reduce extreme click synchronization between tools (a single click in one window could easily destroy a selection in another)
- Import KMZ files more robustly (some were prematurely rejected)
- PDF: hefty scrollbar movement could cause crash
- Reject unloadable PDFs from Coding Analyzer procedure
- A-Docs F4 import
- Assign of documents with DBCS path failed
- Ensure valid path for GE 3D screenshots
- Create TRUNCATED code during survey import only when needed
- Adding SynchroSequences failed while merging

ATLAS.ti 6.2.24

Release date: 2011-06-08

New, Fixed and Improved:

- During HU merge free quotation comments were ignored
- Self-repair for invalid supercodes
- XML export did not ask for including pds and quotations
- Exception in synchro-player when a multimedia document is not loadable and it tries to indicate a position.
- Coding-Analyzer did not work with PDF quotations when PD was not loaded before
- Surveys: extreme performance boost (from days to minutes)
- Storage optimized import for large tables
- Incremental column imports
- Truncation handling with native Excel files
- Display codes in quotation manager column
- XSL style sheet "codes with comments" now displays complete quotations

ATLAS.ti 6.2.20-6.2.23

Release date: 2011-03-25

New, Fixed and Improved:

- Empty window for Word documents with non-ANSI characters in there filename
- Audio quotation could exist twice when created with different buttons
- Family Assigner threw an error
- Survey Import protection violation
- Merging HUs with A-Docs created a large number of redundant synchro lists (fattening the HU)

- Signed postprocessor.exe hopefully keeps Kaspersky calm
- Cleaned up and unified all textual reports
- Background info display for multi media docs much nicer ...
- Provision for starting ATLAS.ti in Safe Mode
- Cooc table label less Under Construction

ATLAS.ti 6.2.19

Release date: 2011-02-22

New, Fixed and Improved:

- Enter document edit mode when creating an internal document
- Ctrl-A now selects ALL PDF pages when in continuous page mode
- Improved handling of missing resources for comments and memos (USB stick removed during work, etc)
- Recognize and reject HU with manipulated file extension
- Autocoding on non-loaded PDFs
- Family Assigner faulted when changing items while tool was open
- Windows moved to a secondary monitor did not display (well, they did in the area of the other monitor ...) in primary monitor area when secondary monitor was detached
- Network editor: display fixes (PD names not displayed, links not drawn after creating codes within the NWE)

ATLAS.ti 6.2.18

Release date: 2011-01-27

New, Fixed and Improved:

- Positioning certain WAV files failed
- Stack overflow error with A-Docs
- Survey import for CSV files failed
- Display of PD nodes in network views suppressed text with certain style combination
- Replace incompatible fonts in networks
- Save HU freshly created via shell menu
- Improved overall stability
- Delay creation of 3-D Google Earth views to not include the menu in the image

ATLAS.ti 6.2.17

Release date: 2011-01-11

New, Fixed and Improved:

- Performance in network editors (nodes were updated rather slowly, e.g. when changing their color)
- Ressource problem in network editors (error occurred occasionally with many nodes)
- In-place renaming network nodes editor frame fixed
- XML converter problem: now hard-wired the encoding for XML output to UTF-8
- Error when double-clicking on some links in network editor
- Auto-coding first search error fix
- Save HU problem fixed (rare)
- New comments for existing entities did not set the HU modified so that you could leave the session without being forced to save the HU.
- PDF with specificy coded pages could produce a "divide by zero" error
- Significantly faster load times for DOC and RTF files.

ATLAS.ti 6.2.16

Release date: 2010-12-09

New, Fixed and Improved:

- PDF fix for out of range legacy quotations
- display quotation count in family and netview browsers
- reset code label color to default by chosing black (all network nodes were black!)
- improved language locales display for Chinese under XP and improved sys report
- XML/XSL Converter ignored all stored XML files, always used the displayed HU.
- Fixed utf-8 coding issue with XML (BOM was missing) and XML/XSL generated HTML (missing utf-8 header)

ATLAS.ti 6.2.15

Release date: 2010-11-29

New, Fixed and Improved:

- DOC converter optimization set to false as default (garbled text with "better" converter in some cases.
- Stop nagging administrative users during update when this is their common account.
- Permanent resorting PDF quoaitions to text flow could create an error
- Volume type description added to sys report

ATLAS.ti 6.2.14

Release date: 2010-11-19

New, Fixed and Improved:

- PDF fixed migration of page spanning quotations
- Survey import process Excel dates correctly
- DOC converter selection optimization led to garbled text in some cases. User can switch this off in Gen. Prefs.
- Margin area bracket display optimized again (modified color wheel, larger comment marks, improved gradient for selections)
- Correctly check for removed drives when trying to save a HU needing access to previous content
- Report Unicode file names correctly

ATLAS.ti 6.2.13

Release date: 2010-11-11

New, Fixed and Improved:

- PDF converter dialog displays old selections correctly, improved handling
- Survey import checks for bad cell format
- Margin area bracket display optimized
- Languages offered by locales menu extended
- Improved reporting for installed text converters

ATLAS.ti 6.2.12

Release date: 2010-11-05

New, Fixed and Improved:

- Survey import offset by 1 case
- Family Assigner double-click now loads PD
- Node rendering overlapping icon with text
- Remember gradient node rendering
- DBCS languages should now display the right font immediately
- Improved error reporting
- Fixed password bug that made HUs not savable in some rare cases

ATLAS.ti 6.2.11

Release date: 2010-11-05

New, Fixed and Improved:

- Survey Import
- New PDF Engine
- Font Themes
- Embedded Documents

- Family Assigner
- XML refreshed
- New looks
- and much more: see here for details

ATLAS.ti 6.1.17

Release date: 2010-08-09

New, Fixed and Improved:

- Some PDFs were not loadable
- Double-click on links in network editors popped up comments as one long ugly line
- Minor bugs

ATLAS.ti 6.1.16

Release date: 2010-06-17

New, Fixed and Improved:

- Fixed: Problems that were introduced with 6.1.15
- Finally: A-Docs now synchronize correctly when a transcript PD was edited.

ATLAS.ti 6.1.15

Release date: 2010-06-14

New, Fixed and Improved:

- Some HUs with A-Docs threw an error after updating to 6.1.14

ATLAS.ti 6.1.14

Release date: 2010-06-11

New, Fixed and Improved:

- Updated QuickTour
- Fixed: A-Docs edit-session and synchronization patch
- Error handler for missing (required) PDF catalog type entry
- Miscellaneous bug fixes with doc converter, leaving doc edit session with discard

ATLAS.ti 6.1.13

Release date: 2010-05-11

New, Fixed and Improved:

- opening the general preferences a second time was possible and resulted in ATLAS.ti not exiting cleanly
- weird state of the main pane when discarding changes after editing a primary document
- fixed a spurious memory problem when opening DOC files

ATLAS.ti 6.1.12

Release date: 2010-04-27

New, Fixed and Improved:

- Display families in object managers: Switch to details view. The column with families will be the last column. You may drag it to a more appropriate position.
- PDF problem with freezing screen fixed
- fixed: issue when searching in a textless PDF
- calculating memory size more precisely

ATLAS.ti 6.1.11

Release date: 2010-02-23

New, Fixed and Improved:

- Renumber quotations according to their document position (either from menu Documents\Miscellaneous or Quotations\Miscellaneous)
- Fixed significant performance bug when merging large HUs and rearranged the merge workflow (load source HU AFTER confirming the merge strategy)
- New samples (Jack the Ripper) matching the new quick tour: Open Help menu Quicktour
- Create merge report with non-proportional font for better alignment
- Code-PD table with total count = 0 created an error
- Improved feedback during Autocoding

ATLAS.ti 6.1.10

Release date: 2010-02-04

New, Fixed and Improved:

- CopyBundle: select only current filtered PDs for a bundle (press CTRL when clicking the exclude docs button)
- Assign PD to A-Docs association fixed
- PDF compatibility test failed in some cases
- Cooccurrence Explorer error with quotationless PDs
- Processor cache problem (very rare)

- Misc stream optimizations
- Networks: spurious error when un/linking objects
- Preliminaries for new PDF engine to be released with 6.2
- Preliminaries for Smart PDs to be released with 6.2

ATLAS.ti 6.1.9

Release date: 2009-12-11

New, Fixed and Improved:

- Fixed bugs that crept in with Google Earth 5.1 (3D Snapshots, navigating GE quotations)
- SPSS increased field width fixes restriction to amount of quotations
- Code-PD Table failed with totals = 0
- streamlined internal font management

ATLAS.ti 6.1.8

Release date: 2009-11-20

New, Fixed and Improved:

- Fixed "last month" object filter
- Fixed load performance leak for HUs with large networks
- Swapped tool bar icons for horizontal and vertical centered alignment in network editor tools
- Visualize "rename" mode when in-place editing items in themargin area

ATLAS.ti 6.1.7

Release date: 2009-11-13

New, Fixed and Improved:

- A-Docs tool now handles new F4 import format
- Fixed stack error with network views displayed in margin (nws containing nws as nodes crashed the system when trying to calculate their quotations)
- Inform network view manager and margin area about quotation changes - could still be better ...
- Draw networkViews and families correctly in NWE (didnt draw shadow when using GDI+)
- Draw NWE nodes in light paper back color
- New object filters: This month, Last month
- Extended Systemreport
- Prepared startup sequence for future server operation

ATLAS.ti 6.1.6

Release date: 2009-10-23

New, Fixed and Improved:

- Modifying quotation bounds could result in corrupted HUs in rare cases: selecting a HU in one PD, then switching to another PD of another type (e.g., from PDF to plain text), then making a new selection and press Modify). This HU after being saved would not be loaded again.
- PDF rendering failed with certain underspecified PDF documents and created subsequent floating point errors.
- Cooc Table memory was not released when closing the browser
- Zoom menu from HU Editor status window now also pops up with right-click

ATLAS.ti 6.1.5

Release date: 2009-10-09

New, Fixed and Improved:

- fonts set via preferences were not applied to network editor

ATLAS.ti 6.1.4

Release date: 2009-10-02

New, Fixed and Improved:

- auto coding back again - failed after last update
- displayed co-occurrence calculations were too generous
- storage procedures revised for added robustness

ATLAS.ti 6.1.3

Release date: 2009-09-18

New, Fixed and Improved:

- cooc table export Excel + ctrl key = best pairs report
- reduced number of decimal places in Excel export to 2
- XSD scheme based a-doc synchronization lists
- setting color scheme failed
- taskbar icon did not update number of open windows correctly
- inter HU memo drag & drop missed migrating the memo content under certain conditions
- resource leaks when processing large numbers of PDF documents (e.g. when auto coding)
- resource leak when opening multiple HU editors

ATLAS.ti 6.1.2

Release date: 2009-09-18

New, Fixed and Improved:

- cooc table export Excel + ctrl key = best pairs report
- reduced number of decimal places in Excel export to 2
- XSD scheme based a-doc synchronization lists
- setting color scheme failed
- taskbar icon did not update number of open windows correctly
- inter HU memo drag & drop missed migrating the memo content under certain conditions
- resource leaks when processing large numbers of PDF documents (e.g. when auto coding)
- resource leak when opening multiple HU editors

ATLAS.ti 6.1.1

Release date: 2009-09-08

New, Fixed and Improved:

- misspelled comp mode dialog when loading A5 HUs
- fixed instability in entity drop down buttons

ATLAS.ti 6.1.0

Release date: 2009-09-04

New, Fixed and Improved:

- Mixed versions team support: allow users of A6 to exchange projects with A5 users
- PDF link navigation (internal and external links)
- A-Docs: Fixed import F4 word files
- Recognize Windows 7
- Launching Google Maps from a geo tagged image pd displays a flag at the exact position
- Storing HUs: Improved stability and performance
- a few more fixes ...

ATLAS.ti 6.0.23

Release date: 2009-06-12

New, Fixed and Improved:

- Consolidates all add-ons, improvements and fixes since CD/Web Setup release (6.0.12)
- Brings back HU Merge with slightly modified merge dialog
- Fixed spurious quote duplication due to quotation merge

ATLAS.ti 6.0.22

Release date: 2009-06-05

New, Fixed and Improved:

- Co-Occurrence Table Browser - Beta\n\nFixed & Improved:
- PDF selection anomalies with documents containing mixture of portrait and landscape oriented pages
- Some PDF documents failed to load
- prevent PDFs being dropped on memo manager
- Associated Docs: improved handling of A-Docs manager
- several other fixes

ATLAS.ti 6.0.21

Release date: 2009-05-22

New, Fixed and Improved:

- Network Views Color tool menu:
- Use (colored label) as node (background) color
- Use high contrast label - use white instead of black for dark colors\n\nFixed & Improved:
- PDF speed increase (from last build)
- Print Networks with colored labels (also fixes metafile copy & paste & save)
- tabs in code family names could prevent opening any window
- several other fixes

ATLAS.ti 6.0.20

Release date: 2009-05-15

New, Fixed and Improved:

- XSLT transformation did not work for some style sheets
- Reset HU pass word failed
- some PDF documents displayed their print margins plus markers making the page look small
- with other than 96dpi screen resolution PDFs were not displayed correctly
- auto coding did only assign quotation names for the selected PD

- some live update settings did not work
- several other fixes

ATLAS.ti 6.0.19

Release date: 2009-04-30

New, Fixed and Improved:

- Does NOT yet include the co-occurrence table tool!-(
- Goto page number in non-textual paged documents (PDF and multi-page TIFFs) using the GOTO line/paragraph tool
- Display quote index with Display Coordinates option in the margin
- Use systems hand cursor in network views\n\nFixed:
- PDF search stopped at end of page in some cases
- PDF on DBCS systems caused spurious errors when moving the mouse
- several other fixes

ATLAS.ti 6.0.18

Release date: 2009-04-17

New, Fixed and Improved:

- Compatibility test for PDF files during PD assignment
- Include code families in quotation reports
- Snapshot and 3D settings fot Google Earth
- New menu item to create 3D snapshot files (in PD Assign menu)
- rich code comments for network nodes were not converted to plain text, thus displaying the rtf tags instead
- 3D image creation failed
- show quotations at current cursor pos failed with PDF
- fancy toolbars sometimes threw a color error

ATLAS.ti 6.0.16

Release date: 2009-04-03

New, Fixed and Improved:

- links connected wrongly when opening or refreshing network editor
- nwe rare problem with quotation nodes
- spurious errors when loading a PD
- SPSS export failed with PDF PDs (for now using missing values for quotation coordinates)

ATLAS.ti 6.0.15

Release date: 2009-03-27

New, Fixed and Improved:

- use My Pictures folder for 3D Google Earth images
- new setting to disable multimedia key support
- Network Editor: cursor flicker in hand mode
- error with image PDs
- blank nodes (after linking or refreshing)
- inplace node rename rectangle was misaligned
- double-click on a selected node initiated an in-place edit which removed the comment tip immediately
- HTML embedded PDs (and replacement text for PDF docs)
- PDF: mouse over error
- PDFs with hybrid references failed
- documentHolder error
- memos report "y not understood" error

ATLAS.ti 6.0.14

Release date: 2009-03-20

New, Fixed and Improved:

- network editor hand mode: scroll the network in ANY direction by holding down the CTRL and SHIFT key while dragging with the left mouse button.
- better resolution of path less file locators in a-doc associations
- improved import of F4 transcripts created with Word
- store code colors in HU XML output
- PDF: lost selection when scrolling
- PDF: fixed scrollbar anomalies
- PDF: error when moving mouse over certain areas
- Mac/Parallels: eliminated flicker in margin area (and informed Parallels to fix this bug in a future release).

ATLAS.ti 6.0.12

Release date: 2009-03-06

New, Fixed and Improved:

- Zoom menu in status window
- Ctrl-P on selected text plays associated media section for A-Docs
- Persistent settings for new margin objects (Gen Prefs)

- Create 3-D images from Google Earth terrain (Hold ctrl-key during Create GE Snapshot)
- Import nodes in network editor failed
- Drag & Drop of families into a network editor failed
- Import neighbors ignored current filter settings
- PDF quotes did not show their textual contents when required (margin, network)
- Merging HUs ignored A-Docs specifications
- insetBy: error when embedding Google Earth

ATLAS.ti 6.0.2

Release date: 2009-02-23

New, Fixed and Improved:

- New and revised toolbar/menu icons
- Code color propagation into network editor (see color menu)
- Performance tuning
- GoogleEarth quotations deliver textual output

ATLAS.ti 6.0.1

Release date: 2009-02-20

New, Fixed and Improved:

- AssoDocs improved
- New and revised toolbar/menu icons
- Delete deleted from margin area
- Proximity comparisons of PDF selection (sounds trivial, is complex)
- Super things (QueryTool, etc.) failed
- User settings were not persisted (toolbar colors, etc)
