

Update History ATLAS.ti 7

ATLAS.ti 7 (2012-2016)

ATLAS.ti 7.5.18

Release date: 2017-06-06

Fixed and Improved:

- Improved handling of bundle export for projects with duplicate links

ATLAS.ti 7.5.17

Release date: 2017-02-23

Fixed and Improved:

- Export Transfer (Mac/A8) bundle performance increased significantly
- Improved accessibility report for password protected or otherwise not loadable PDFs
- Fixed PDF lookup table generation for project bundle on DBCS. (Table was unusable – import failed)

ATLAS.ti 7.5.16

Release date: 2016-11-25

Fixed and Improved:

- Export Transfer (Mac/A8) bundle performance increased significantly
- Adding large video files to a bundle could throw an error
- Rare crash with video files on very fast computers

ATLAS.ti 7.5.15

Release date: 2016-09-15

Fixed and Improved:

- Wordcruncher created memory fault with large collection of documents
- Issue with merge of pdf graphic quotations
- Demo mode accidentally activated for non-trial licenses

ATLAS.ti 7.5.16

Release date: 2016-11-25

Fixed and Improved:

- Export Transfer (Mac/A8) bundle performance increased significantly
- Adding large video files to a bundle could throw an error
- Rare crash with video files on very fast computers

ATLAS.ti 7.5.15

Release date: 2016-09-15

Fixed and Improved:

- Wordcruncher created memory fault with large collection of documents
- Issue with merge of pdf graphic quotations
- Demo mode accidentally activated for non-trial licenses

ATLAS.ti 7.5.13

Release date: 2016-08-23

Fixed and Improved:

- Encloses and overlaps operator did not work correctly in PDFs with graphical quotations
- Fixed issue with merge of pdf graphic quotations

ATLAS.ti 7.5.12

Release date: 2016-05-30

Fixed and Improved:

- Print families with quotations grouped by the respective family members (Families menu in family manager)

- WITHIN operator should not accept a quotation being within itself (q1 within q2 < > q2 within q1), in other words a quotation within another must be smaller than the embedding quotation
- Creating zip archives (copy bundle) on DBCS created problems

ATLAS.ti 7.5.11

Release date: 2016-04-11

Fixed and Improved:

- Use new text format version (AHTML2) when exporting (to Mac, A8) transfer bundles
- Cooc: Switch to using strict (codes refer to the same quotation) cooccurrence only in Cooc Table (ignore overlaps and embeddings)
- Prohibit dragging object explorer root elements into network editors
- Cooc: Display of clustered cooccurrences was unstable when switching c-coefficient display
- Display header background correctly when changing the setting accordingly
- Correct sorting of codes in the selection lists
- SPSS: author names longer than 10 characters
- Importing large files performance improved
- Corrected word count when using go list
- PD families quotation count was not updated with ne or deleted quotations
- Network manager was not sorted correctly
- HTML export sometimes showed an error in the presence of graphic pds
- UTF-8 encoding for html and xml output corrected

ATLAS.ti 7.5.10

Release date: 2015-10-15

Fixed and Improved:

- Support for KMZ Point-Placemarks
- Improved error handling when using word converted documents
- Faster Unicode to RTF (with font correction)
- NetworkView Editor
- Z-order handling
- Show identical pop-up menu for nodes in a multi-selection
- Import codes on multi-selection pop-up menu
- Linked Word documents not displayed correctly after making them managed.

- Error in Object Explorer when clicking on a PD family
- Mac Transfer Bundle optimization

ATLAS.ti 7.5.9

Release date: 2015-08-25

Fixed and Improved:

- Ring bell when lengthy autocoding has completed
- In 7.5.8 the NetworkView Editor could not be opened

ATLAS.ti 7.5.8

Release date: 2015-08-21

Fixed and Improved:

- Correctly display Windows 10 version in system report
- NWE: Import neighbors menu for pd families offers (transitively derived) codes
- NWE: Toggle display of transitive links via display link menu or hold ctrl key while pressing the link button (dirty but comfortable!-)
- Remember output folder settings for cooc and pd-codes table
- Virtual PD-Code links back in town (broke in 7.5.7)
- Library manager when there is no initial revision for a data source
- Clear button on search field when entry field had no focus
- Spurious GDI error in managers with frequency bars

ATLAS.ti 7.5.7

Release date: 2015-07-02

Fixed and Improved:

- Show virtual/transitive links between PD families and codes in network editor New menu option (link display).
- Detect incompatible version of Google Earth
- Show progress when creating code cooc report
- Updated (english) QuickTour
- Invisible main window under Windows Vista SP2 with latest patches
- Forgot team project flag and assigned new documents in local library when restored from timer backup
- Links were drawn above nodes after node import

- Crashed occasionally when leaving session with open text editors (reports, etc.)
- Handle transitive links in NWE when linking/unlinking codes to quotations
- New order link in license notification dialog
- Creating transfer bundles with large files > 2GB failed
- HU crashed when saving after importing ADoc from .syn file
- "alternativePosition: not understood" when position is missing in A-Doc XML storage

ATLAS.ti 7.5.6

Release date: 2015-03-10

Fixed and Improved:

- Occasional 7.5.5 startup bug fixed

ATLAS.ti 7.5.5

Release date: 2015-03-10

Fixed and Improved:

- Dont show the confusing (for some) welcome HU on first start (irrelevant when you update as you already had your first start of ATLAS.ti)
- Changed auto completion back to search within names, prefix with " to handle leading numbers (e.g. "55)
- Margin display
- "Feature not available" when chosing Internal for output in Code-PD Table
- DPI correction for HU Editor status pane (overlapping or clipped fields)
- Excel survey import date bug
- Importing docx files when the converter was not installed
- HU Merge bug
- Network editor:
- Menu Link Nodes was disabled if more than onme node was selected
- Select (Node) from list crashed
- Switching between symmetric link display with or without arrows
- Ctrl key when opening certain windows activated transparency which was often not what the user wanted
- Prevent more than one quotation with same GUID

ATLAS.ti 7.5.4

Release date: 2015-01-15

Fixed and Improved:

- Changed auto completion in code creation/selection dialog to handle leading numbers
- Updated help menu resources
- Single column ids for memos more verbose
- Updated Quick Tour
- Margin display (missing quotation brackets or non-responsive)
- Semantic operator SIB collected too many quotations (further up the hierarchy)
- Network editor context help menu
- PDF pages crashed under rare conditions

ATLAS.ti 7.5.3

Release date: 2014-12-01

Fixed and Improved:

- Enable trial version to upgrade HUs for export to Mac
- Reenabled Set Library Location in Library Manager
- Do not ignore leading dashes when sorting items in managers
- Several preparations for next major release
- Performance issue when saving large HUs
- Correction of invalid PDF text locators if start or end is on non text page
- Fix for "position outside of stream" when checking multimedia files quality.
- Make coc table respond to setting changes again (toggle cluster, etc)
- Fix on TransferBundle export – end offset on end of last paragraph exceeded valid range
- Fixed bug with shortcut file links
- Fixed splitter bug
- Fix an issue with HUs installed from a copy bundle where the project library stores a different location for the team library as the existing library on the machine

ATLAS.ti 7.5.2

Release date: 2014-09-26

Fixed and Improved:

- Check compression state of HU more reliably
- Automatic retry when transfer bundle converter module quits working
- Dont overwrite existing bundle when bundling fails
- Problems with writing text and PDF locators to transfer bundle affecting Mac import

ATLAS.ti 7.5.1

Release date: 2014-09-18

Fixed and Improved:

- Report converter modules in system report
- Include geo locations in transfer bundle (but not yet interpreted on Mac side)
- Clip code names to 200 characters (we had a 80.000 character code name making some problems)
- Allow replacement of modified (non textual, non editable) documents in library via reassignment
- Too early initialization of cloud view in code manager
- Transfer bundle mapping
- Transfer bundle recursion crash
- Export selected codes in XML falsely reported inclusion of dependent items
- PDF Table in bundle

ATLAS.ti 7.5.0

Release date: 2014-09-09

Fixed and Improved:

- Project specific libraries avoid huge amounts of files shared by many projects and prevent accidentally sharing sensible data
- Export Mac compatible project bundle (currently of interest for the Mac beta users)
- Cooc table browser redesigned and improved
- German user interface
- Resettable merge strategies
- Replaced old style browse for folder dialog (Vista and better)
- Memorize folder settings for different tasks (networks as graphics, spss, transfer bundle, etc)
- Import F4 media files as external linked
- Some dialog windows resized to improve fit of localized text versions
- Modified user manual

- Multimedia quotation modification artifact (the quotation selected in the HUeditor was modified)
- Queries with many PDFs involved (ticket 106487)
- Survey import ignore empty columns without failing
- Issue copy bundle with managed files (same original files were already in the library but imported from a different location)
- Invalid XML characters under certain conditions
- HTML doc external references did not work
- Unification of ADocs during merge
- Dimmed icons for codes in q-manager side panel – finally
- Relation editor selection aware
- Adding ADocs when merging
- Issue with renaming of SkyDrive to OneDrive by Microsoft when detecting cloud services

ATLAS.ti 7.1.8

Release date: 2014-03-04

Fixed and Improved:

- Import ATLAS.ti for Android projects
- Audio Video:
- scroll pagewise in non-sync mode
- let Video perforations scroll smoothly
- Ensure side panel splitter in managers to always be visible
- Inform the user which data source is deleted when deleting datasources in the library manager.
- Add a progress dialog to the delete data source functionality in the library manager
- Do not display already entered codes in the new code dialog
- Mark Codes in side panel of quotation manager according to selected quotations
- Sliding the splitter between side panel and main list too far could result in inaccessible manager items
- Closing an unsaved HU could result in removing documents used by other HUs
- Fix for not unplayable videos (with objects not shown in the margin)
- RichText printed with margin was sometimes misaligned
- When a pd family was used as a filter the survey import failed
- Empty NWE throws error when trying to copy nodes to clipboard
- In some cases the user was always asked for the UI language on startup

ATLAS.ti 7.1.8

Release date: 2014-03-04

Fixed and Improved:

- Import ATLAS.ti for Android projects
- Audio Video:
 - scroll pagewise in non-sync mode
 - let Video perforations scroll smoothly
- Ensure side panel splitter in managers to always be visible
- Inform the user which data source is deleted when deleting datasources in the library manager.
- Add a progress dialog to the delete datasource functionality in the library manager
- Do not display already entered codes in the new code dialog
- Mark Codes in side panel of quotation manager according to selected quotations
- Sliding the splitter between side panel and main list too far could result in inaccessible manager items
- Closing an unsaved HU could result in removing documents used by other HUs
- Fix for not unplayable videos (with objects not shown in the margin)
- RichText printed with margin was sometimes misaligned
- When a pd family was used as a filter the survey import failed
- Empty NWE throws error when trying to copy nodes to clipboard
- In some cases the user was always asked for the UI language on startup

ATLAS.ti 7.1.7

Release date: 2014-01-09

Fixed and Improved:

- Ctrl-A = select all in object managers now behaves correctly: cares for pane with focus
- Numerically correct list sort: 1,2,10 not 1,10,2
- Link browsers now object filter aware
- Redundant quotation merge speed
- Dropping a PD on the AssociationEditor with Ctrl-Key pressed will exchange document reference. This is needed as a repair functionality for broken document references in ADocs
- Error when closing maximized or minimized window (rare)
- Survey import refused to function with only a single case
- Survey import under Windows XP interpreted the first row (field names) as an additional case
- Word cruncher Go and stop lists work as expected
- Flicker with side paneled managers when opening with side panel closed

- Apply on GeneralPreferences will no longer invalidate an (earlier) chosen code page
- (Embedded)Object menu works
- Merging two HUs with PDF quotations while PDF PD is open

ATLAS.ti 7.1.6

Release date: 2013-10-28

Fixed and Improved:

- Codes-PDs Table:
 - refresh lists after adding or removing codes and pds in the HU
 - removed unused option (web) and info pane at the bottom
 - display title in report text window
 - wider columns in output
- Auto completion in open coding dialog now matches words in the middle of the code name (previous behavior anchored the search to the beginning, press ctrl key when opening the OpenCoding dialog to fall back to this behavior)
- Include quotation numbers in the search filter
- Offer partial Copy Bundle on PDs selected in the PD manager
- Quotation Manager now with side panel displaying "families" for quotations (= codes)
- Survey import:
 - tab delimited format failed
 - cancel button now works as expected
 - remember default file filter during session
- QueryTool buttons overlaid labels when resized too small
- Wordcruncher crashed with large Excel XML output
- Left mouse button + shift pressed -> PDF error
- Ticket 89669 PDF not loaded
- Quotation picker list now stays quiet when only one quotation associated with a code
- Family panels size not correctly stored when window was opened full screen
- Sort side panel families by name
- Handle problems when converting protected Word documents

ATLAS.ti 7.1.5

Release date: 2013-10-07

Fixed and Improved:

- Rare error [id not understood] when loading PDF documents

- iPad import: no longer empty quotation names (export format was changed/extended against earlier versions)
- Flicker when expanding hierarchies
- Setting adoc anchor at document end
- Deleting empty adoc association failed
- After creating a new font scheme switching the code page could issue an error
- QueryTool top buttons overlapped label when reducing size

ATLAS.ti 7.1.4

Release date: 2013-09-19

Fixed and Improved:

- Added centralized Windows crash reporting
- Family side panel menu new option: remove selected items
- Try to invoke Word to convert a document to RTF unless a converter was found
- Quality of 90 deg rotated videos increased
- Loss of resources when opening the same PD in more than one region
- Positioning of red dots in A-docs
- Do not assume plain text format if a converter fails on a Word document
- Filtered state background color not displayed when reopening a manger
- WordCruncher with empty documents failed
- WordCruncher Excel output failed when xml extension not associated with InternetExplorer
- Video on secondary monitor could hang
- iPad import could fail
- HTML export without codes failed
- Navigation pane flicker when switching PDF pds
- Filedialog leak
- Improved robustness when saving preview information

ATLAS.ti 7.1.3

Release date: 2013-08-15

Fixed and Improved:

- Random crashes "out of operating system resources" or "mapToWindow: not understood" happened on some Window 7 systems

ATLAS.ti 7.1.2

Release date: 2013-08-13

Fixed and Improved:

- Rich edit library load order
- Closing link manager crashed
- Moving PDF quotations (when created by mouse selection)

ATLAS.ti 7.1.1

Release date: 2013-08-05

Fixed and Improved:

- Family side panel settings persisted
- Update-post-processing splash screen
- Document quality dialog menu bug
- Display comment mark (tilde) in margin hyperlinks, removed space between commented link and mark
- Sort bug
- Spanish language and English typos
- Version 6 projects with a-docs "initialFileExtension:" bug
- Correctly check files > 4GB
- Ensure installation of rich edit control
- Removed unnecessary overhead when opening the HU editor

ATLAS.ti 7.1.0

Release date: 2013-07-31

Fixed and Improved:

- Selectable user interface language: Spanish
- ATLAS.ti Mobile iPad project import
- Auto rotation of portrait and landscape view for imported videos
- Geo button for all documents containing geo references
- Ctrl-N opens new HU editor
- Multiselection menu in network editor
- lots of stuff ... relayouted a number of dialogs to fit other languages
- improved stability of document management
- Revived in-place editing in managers
- PD-Code links drawn in darker gray
- Improved robustness when reading audio preview information
- Hyperlink content duplication on double-click in margin
- New Memo Prompter typo
- Memo editor caption reflects type

Known issues (will be addressed):

- iPad imported and rotated videos look suboptimal when playing but file quality is as configured
- Opening an iPad imported video on a second monitor might crash the session

ATLAS.ti 7.0.92

Release date: 2013-06-11

Fixed and Improved:

- added M4A to legal audio file extensions
- increased speed of loading documents with large hus containing adocs
- sample multimedia files to check for applicable codecs
- splitter bar in pd manager was a bit sticky when moving it horizontally for a while
- endless refresh of dropdown lists when leaving edit mode
- extended multi media quality check (mov files) could create stack overflow
- PDF paragraph expansion problem when autocoding
- issue with creating the wrong fallback (plain text) for multi media data when the needed codec is not installed

ATLAS.ti 7.0.91

Release date: 2013-05-23

Fixed and Improved:

- problems when Tahoma font is not installed (very unusual)
- deployed missing xml stylesheet updates

ATLAS.ti 7.0.90

Release date: 2013-05-15

Fixed and Improved:

- Added support for exporting managed files
- Dialog for deleting library entries
- Merge HUs
- Link to memos error
- Accessibility report threw an error under certain conditions
- Choose correct renderer for memos used as PDs
- Misalignment of rich text files containing section breaks under Windows 8
- File type images in XML converter

ATLAS.ti 7.0.89

Release date: 2013-04-15

Fixed and Improved:

- Allows a user to reset PDS which are not loadable due to missing revisions to the latest available revision
- Survey Import: 1 and 0 were not correctly recognized as family membership yes/no
- sqlite support for reliably detecting Google Drive paths
- Cooc: Adjacent images in PDF documents were interpreted as overlapping
- Cooc: prevent buttons in selection lists to disappear upon resize
- Ambiguity of space vs underline characters in file names
- Missing document when comparing PDF quotations (cooc calculations etc)

ATLAS.ti 7.0.88

Release date: 2013-03-21

Fixed and Improved:

- Relaxed restriction on storing HUs in cloud storage
- Show progress when saving HU
- Performance boost for library manager on large libraries
- Show progress when validating libraries
- Rectangular selections in PDF docs
- Spurious display issue in side panels: items seem to have vanished
- Avoid error when trying to store location of MergWiz after it was closed (eg. during a long long merge process)
- Accessibility report on video pd opened zombie window
- Merge unnecessarily required accessible documents
- Error "Attribute Value Invalid" when closing a HU editor after a merge

ATLAS.ti 7.0.87

Release date: 2013-03-15

Fixed and Improved:

- Open new network on all selected nodes (nodes menu)
- Dropping items onto network editor
- SPSS performance
- Comparison of unifiable PDs
- Pop up menus in memo dropdown and query tool

- Merge unify preserve identity when merging into blank HU

ATLAS.ti 7.0.86

Release date: 2013-03-11

Fixed and Improved:

- Warning when copy bundles exceed volume file limits
- Improved feedback for copy bundles and HU saves
- Increased load performance for large HUs
- Prevent saving HUs in cloud drives
- Warn when loading from cloud drives
- Allow D&D from link managers to network editor
- MemoPDs were not correctly migrated
- Concurrent HU access on shared drives
- Large Excel file (> 70 MB) creation failed
- Determining the Google Drive location
- Drag&Drop multiple objects from side panel, also wasn't global
- WordCruncher window didn't display options in non-100% screen scale
- Clip survey rows after last header index
- PDF memory leak
- Only run a 6.2 PDF conversion with locators of version 2.0
- Don't try to run post process PDF converter if a document holder cannot be obtained
- Creating GDI+ font failed in some cases
- Issue with installing a copy bundle containing identical documents assigned from different paths
- Issue with copy bundles where one bundle's data source names contained underscore characters where the other contained spaces

ATLAS.ti 7.0.85

Release date: 2013-02-05

Fixed and Improved:

- Coding context menu for text pds was disabled
- Keyboard coding shortcuts were disabled
- Switching users and login threw a bug when displaying the welcome message
- Wordcruncher removed maximize button and resizing frame
- On DBCS the search entry field in managers could not find text after saving and loading the HU

- When remapping linked documents also update the ADocs references
- Ugly side panel code list background in autocolour mode

ATLAS.ti 7.0.84

Release date: 2013-01-29

Fixed and Improved:

- New: PD Merger lets you merge unifiable PDs. This can be very practical when PDs were accidentally added during a project merge. -> PD manager menu Miscellaneous\Merge selected PDs
- Word Cruncher reloaded: New word recognition for improved Unicode handling, many more settings: include word length, absolute and relative counts, totals, sum only, etc., launch cloud via WC dialog, stop and GO lists, removing words from cloud adds them to stop list, sort by size in tag cloud, word count on mouse hover, and more
- Open WordCloud on selected PDs in manager
- List Dropbox, Google Drive and Microsoft Skydrive in system report
- Moved copy bundle procedures to more prominent places in the project menu
- Moved side panel toggle button
- Updated manual and on-screen help
- Stability issue under Windows 8
- Memo mix-up caused by XML export
- Auto Coding shifted PDF quotations bug
- Survey Import: CSV import, handling of empty cells, make cell content truncation a rare thing
- Word Cruncher: only last regex in stoplist was processed
- "Play Selected Text" error when wrong region was activated
- quotations spanning the complete PD were almost invisible in the margin

ATLAS.ti 7.0.83

Release date: 2012-12-11

Fixed and Improved:

- Multimedia: Support for M4V and M4A files
- "New" RichEdit control (table support) for all text panes
- Warn user when discarding document edits when quotations have been created
- Progress feedback when collecting documents for copy bundle
- Warning when trying to move a library into Dropbox
- Removed reload selected PD from manager menu
- Drag text into network editor (from pd pane = creates quotation, from any other = new memo)

- Wordcruncher: Supports DBCS languages. Eliminates the nasty dialog that Excel shows when trying to open tab delimited files.
- Behind the scenes: Create Wordcruncher Excel output as XML (SpreadsheetML).
- PDF word detection fixed (was a ticket comparing A7 with nVivo showing that A7 split words of a specific PDF file into meaningless fragments)
- Videos with non-square pixels (fuzzy previews, distorted video and video frame pds)
- HU crunching bug mixing quotations from other PDs fixed!
- Merge HUs: preserve the unique id (guid) for added documents unless in case of a conflict. This prevented unifying merged documents when merging into an empty HU.
- and various additional improvements

ATLAS.ti 7.0.82

Release date: 2012-11-22

New, Fixed and Improved:

- Do not include links to managed files in HTML export
- edited managed documents with spaces in their pathname were not loaded under certain conditions
- allow "change path" for linked documents which could not be loaded
- Crawler forgot the last selected query when switching between the tabs
- Find/Replace dialog was not DBCS aware
- Missing bullets in HTML export

ATLAS.ti 7.0.81

Release date: 2012-11-15

New, Fixed and Improved:

- On URL links in RTF documents display an arrow cursor instead of a pencil
- Check for modified revisions in the libraries and synchronize accordingly
- Improved accessibility report
- With open quotation selector window (after double-clicking a code or memo), deleting a quotation threw an error
- Rare display bug when merging codes in network editor
- Resolve document fallback correctly when the data source is added by another machine in the network
- Misplaced text in about box

ATLAS.ti 7.0.80

Release date: 2012-11-07

New, Fixed and Improved:

- SPSS: include author with each quotation, include doc type, positions reworked, miss val for geo docs
- Resizable quotation selector
- Finer grained speed setting for multimedia
- Admins: registry settings to suppress auto update (for setup only)
- Improved some messages (edit mode warning for regions)
- Cooc table dropdown list width corrected
- Survey import handles Unicode cell content correctly using the current codepage
- XML import (codes/memos) handles Unicode (respects the users current code page setting)
- F4 import - another adaption to changed format

ATLAS.ti 7.0.79

Release date: 2012-10-18

New, Fixed and Improved:

- removed "object" header from all single column lists
- Autocoding stumbled over non-text pdfs
- starting code-pd table from codes menu did not work
- SPSS: replaced PROCESS IF with SELECT IF in job section
- Cooc table settings were ignored
- Creating multimedia previews on read only media (CD) failed
- Merging HUs with A-Docs added documents instead of unifying

ATLAS.ti 7.0.78

Release date: 2012-10-15

New, Fixed and Improved:

- SidePanel families: open network on selected (menu)
- Bring back coloring to link manager, added search field, open relation editor tool.
- Star and Chain hyper linking workflow revived
- NWE: Restrict topoSort to codes when pressing ctrl, to quotations with ctrl+shift
- Display expiration date (if any) in main screen
- ReportBundle always includes repository data
- Display searched columns in search filter pane default text
- Updated manual and F1 on-screen help
- Moving a library with invalid items failed
- Workaround for migrating a version 6 HU when converting of linked documents to managed documents fails

- Saving HUs with many documents could take a very long time - obsolete checks removed
- AutoCoding: endless refresh after the coding process. Prevent concurrent autocodes to compromise data integrity
- NWE:
 - User defined node sizes usage corrected when saving network view as graphic and when copying to clipboard.
 - Unsaved NWE changes are not lost when closing the HU
 - Close all NWEs fixed
 - Bring back help texts in status pane (nlsPrefix was not set to NET)\n
 - Search pane crashes in managed repository browser due to a typo
 - Right click on grafical quotation resizing handle created error\n
- F4:
 - curly brackets in transcripts now correctly processed
 - Dont ask for companion multi media file\n*
 - Dont enable timer backup if any of the regions is in edit mode
 - Fixed tooltips for super family tools

ATLAS.ti 7.0.77

Release date: 2012-09-18

New, Fixed and Improved:

- F4 Import accepts Transana files (changed menu entry "Import A-Docs")
- Copy docs between my and team library
- Multimedia:
 - New shortcuts , and . for start and end selection (should fit most keyboards)
 - Changing selection / current position snaps to each other. SHIFT key overrides this.
 - CTRL key pressed speeds up left/right arrow position changing 20 times.
 - Select code created in AutoCoder
 - In-place activation of embedded objects deactivated
 - Display code colors in side panel
 - Allow in-place rename in side panel
 - Added 30 days grace period after license expiration
 - NWE: reduced gap between arrow head and node border, brought back some shortcuts (e.g., ctrl-L for auto layout)
 - Display time instead of frames for video quotations in manager and reports
 - Dont use temporary folders during document assignment
 - Select a newly created code in autocoding dropdown (not when created elsewhere)
- Extensive preparations for localization

- Prevent using backup of .. HU files directly
- DBCS display in in-place edit fields (network editor, margin)
- Excel import (survey and PD-Families) of tab delimited files
- Traversing hyperlinks in multi doc view
- F4-Import with large videos
- Allow super codes to be dragged to side panel family
- Quotations in RichEdit tables were misaligned
- Fix a bug when terminating loading a single document or the document is rejected
- Copy Rich-text to clipboard for graphical quotations in PDF and graphics
- Bitmap limitation for very big PDF pages.
- Misc. document management issues fixed and improved
- Side panel drag to margin started hor. scrolling

ATLAS.ti 7.0.76

Release date: 2012-08-14

New, Fixed and Improved:

- improved error message when choosing wrong delimiter in survey (etc) import.
- increased quotation picker list size
- doc quality check improved
- extended system report (repository info)
- zero brightness jpgs were not loaded
- spurious problems of hu editor during shut down
- multi line tool tips were truncated after first line (e.g., query tool hints)
- signed executable (atlast.exe)
- misc. hot fixes

ATLAS.ti 7.0.75

Release date: 2012-07-31

New, Fixed and Improved:

- Ask user for mode to export comments (rich or plain) for XML codes export
- Cursor right and a few other virtual keys were disabled with last patch
- NWE: check if entities may link, prohibit linking quotations to super codes
- Repository access on DBCS systems with DBCS paths
- Fixed false behavior of margin in-place edit for objects other than codes and memos. Only allow IPE when in rename mode.
- Ensure loading Multimedia stuff dynamically

ATLAS.ti 7.0.74

Release date: 2012-07-27

New, Fixed and Improved:

- More secure password protection for HUs
- Preparing code for internationalization
- NWE toolbar corrected. Delete entities now really deletes and does not only remove from view.
- Libraries on NON-NTFS file systems (FAT32, USB sticks, network drives)
- Crash of code manager when incompatible font was selected
- Co authors not accepted for saving a HU
- Super codes could be linked in NWEs with families which are included in their queries (=> cycles => crash)
- Prevent deleting data sources that are viewed by a PD in a HU
- Fix a bug when loading data source items for managed files that have no initial revision
- Enhance finding a revision for a managed document
- Locating the library in a folder
- Assigning the same document to two or more HUs and editing them prior to saving them -> error
- PDF floating point error
- Guarding against out-of-limit parameters in foxit fuctions leading to protection violation errors.
- Spurious handle error when closing multimedia docs

ATLAS.ti 7.0.73

Release date:2012-06-29

New, Fixed and Improved:

- Delete button in search/filter fields
- Improved PD selection menu for red adocs region button
- reload repository data in repository browser on activate when the ini files were changed
- Enhanced repair of managed repository
- Fixed:
 - Merge HUs could create artifacts (family twins) that vanished after reloading the HU
 - Thumbnail resource leak could crash the image with > 9000 PDs
 - Don't open welcome hu when a specific hu was opened
 - F4 hypertext extraction failed with hidden in the presence of embedded links
 - enable delete button in repository browser
 - Saving user database
 - NWE: Update edges after changing relations
 - NWE: Linking codes with code families did only work once
 - Merging a copy bundle whose docIndex contains special paths

ATLAS.ti 7.0.71

Release date: 2012-06-16

New, Fixed and Improved:

- updated manual and F1 help
- Support for installing samples in a user sample folder on first run
- Enhance library validation for finding and solving document entries that no longer refer to a HU
- Offer migrate to managed when product (instead of HU) supports managed files feature
- Inform user about loss of compatibility mode for a pre 7 HU
- Draw missing files in lib manager gray not red
- Auto scroll multimedia margin by default
- Fixed:
 - F1 help did not work in some windows
 - Tooltips over zoomed timeline selection buttons sometimes cause buttons to fade out momentarily
 - Side panel redraw problems empty lines
 - Avoid fallback path (on linked DS) to be burned in into the PDs original locator
