

The Qualitative Methods Master Class Webinar Series

Embodiment in Qualitative Research

Researchers begin with the body. Awareness of and an active engagement with issues of embodiment enhances our ability to produce high quality research and enlarges scholars' capacity to spark positive social change. This webinar connects current trends in critical, interdisciplinary theorizing of embodiment with creative, practical strategies for doing embodied qualitative research. Qualitative researchers can move beyond resisting the mind-body split to infuse their research with the vitality that comes from embracing knowledge production as deeply embedded in sensory experience.
